

# Octagon Kaleidoscope

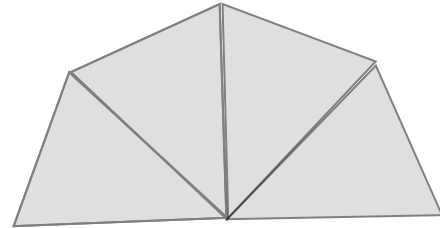

Finished Block 8 1/2"

Kit Makes 12 Blocks

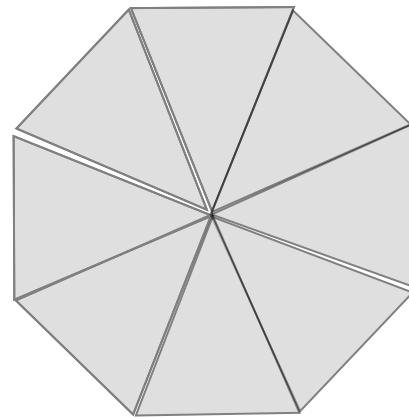

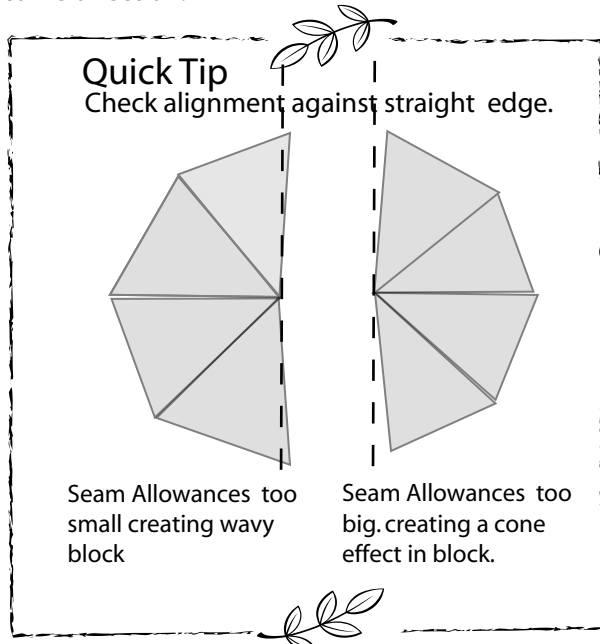

All seam allowances are 1/4 inch. This is very important to maintain the finished size and so that the kaleidoscope will lay flat. Tips are cut flat to reduce center bulk.

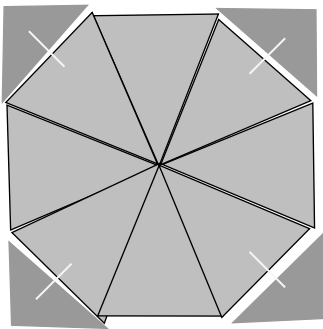

**1. Unit 1:** Take 2 wedges and sew together make 4 units for the block. Press all seams to one side in same direction.

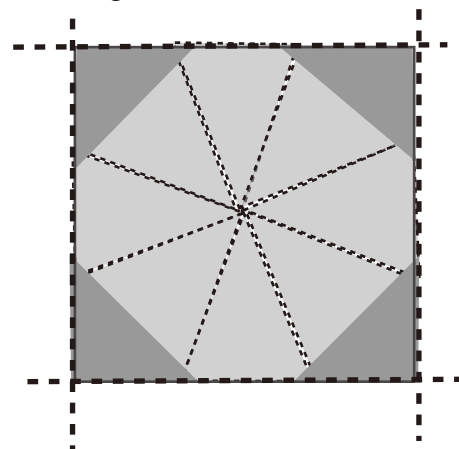

**2. Unit 2 :** Sew 2 unit 1 pieces together making half of the block. Press all seams to one side in same direction.

**3. Unit 3:** Sew unit 2 pieces together making the whole block. Press all seams to one side in same direction or press center seam open. Repeat for all blocks making 12 blocks.

**4.** Sew half square triangles to 4 corners of block by first finger pressing in half the wedges and triangles to help line up. Pinning is recommended because the fabric is on the bias and will move and can make your block difficult to square.

**5.** Block should finish 8 1/2 inches with seam allowances. Make adjustments as needed to square up the block and trim excess, being careful to allow for the 1/4 inch seams at intersections.
